DETAILED ACTION

Claim Objections

Claims 9 and 10 objected to because of the following informalities: the phrases "said fine controller" in each claim should be changed to "a fine controller" since there is no antecedent basis in the claims for the respective recited elements. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ammann.

Regarding claims 1-12, the Ammann reference discloses a device (Figure 1) comprising an inlet and outlet port (64 and 39), a valve body 56, a valve body guide means/piston 42, and a fine controller 76.

Regarding claims 1-8 and 17-19, the Ammann reference discloses a device (Figure 4) comprising an inlet and outlet port (214 and 150), a valve body 156, a valve body guide means/pressure control diaphragms (166 and 168), and a fine controller 234.

Art Unit: 3751

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by lizumi.

The lizumi reference discloses a device comprising an inlet and outlet port (12 and 13), a valve body 18, a valve body guide means/piston 12 urged by compressed air (see col. 3, lines 6-12, and a fine controller 26.

Allowable Subject Matter

Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
